

GEN 3.7 RADIO COMMUNICATION AND NAVIGATION FACILITIES

- # Where multiple VHF frequencies are listed for an ATS sector or unit, the listing is in order of precedence, i.e. first listed is primary, next is alternate, next is secondary, etc. Frequency order shown on the charts presides over any order shown in this table.
- ✧ NAVAID Purpose: A = Aerodrome, E = En-route, AE = dual purpose.
- Note: CAR Part 171 requires all radio navigation aids to have suitable power supplies to ensure continuity of service. This is achieved by battery back-up, supplemented where applicable by standby generators.

Table GEN 3.7-1
RADIO COMMUNICATION AND NAVIGATION FACILITIES – NEW ZEALAND FIR
